Air Cargo Advance Screening (ACAS): CBP began a pilot in 2012 announced via a notice published in **Federal Register** on October 24, 2012 (77 FR 65006). The ACAS pilot is a voluntary test in which participants agree to submit a subset of the required 19 CFR 122.48a data elements at the earliest point practicable prior to loading of the cargo onto the aircraft destined to or transiting through the United States. - (2) Total quantity based on the smallest external packing unit
- (3) Total weight

(4) Cargo description

(5) Shipper name and address

(6) Consignee name and address

Electronic Air Export Manifest: CBP began a pilot in 2015 to electronically collect air export manifest information. This information is transmitted to CBP in advance via ACE's AES.

CBP Form 7533: The master or person in charge of a conveyance files CBP Form 7533, *Inward Cargo Manifest for Vessel Under Five Tons, Ferry, Train, Car, Vehicle, etc.*, which is required for a vehicle or a vessel of less than 5 net tons arriving in the United States from Canada or Mexico, otherwise than by sea, with baggage or merchandise. Respondents may also submit the information on this form using a CBP-approved electronic equivalent. CBP Form 7533, and/or electronic equivalent, is provided for by 19 CFR 123.4, 123.7, 123.61, 123.91, and 123.92, and is accessible at: http://www.cbp.gov/sites/default/files/documents/CBP%20Form%207533_0.pdf.

Manifest Confidentiality: An importer or consignee (inward) or a shipper (outward) may request confidential treatment of its name and address contained in manifests by following the procedure set forth in 19 CFR 103.31.

Vessel Stow Plan (Import): For all vessels transporting goods to the United States, except for any vessel exclusively carrying bulk cargo, the incoming carrier is required to electronically submit a vessel stow plan no later than 48 hours after the vessel departs from the last foreign port that includes information about the vessel and cargo. For voyages less than 48 hours in duration, CBP must receive the vessel stow plan prior to arrival at the first port in the U.S. The vessel stow plan is provided for by 19 CFR 4.7c.

Vessel Stow Plan (Export): CBP began a pilot in 2015 to electronically collect a vessel stow plan for vessels transporting goods from the United States, except for any vessels exclusively carrying bulk cargo. The exporting carrier is required to electronically submit a vessel stow plan in advance.

Container Status Messages (CSMs): For all containers destined to arrive within the limits of a U.S. port from a foreign port by vessel, the incoming carrier must submit messages regarding the status of events if the carrier creates or collects a container status message (CSM) in its equipment tracking system reporting an event. CSMs must be transmitted to CBP via a CBP-approved electronic data

interchange system. These messages transmit information regarding events such as the status of a container (full or empty); booking a container destined to arrive in the United States; loading or unloading a container from a vessel; and a container arriving or departing the United States. CSMS are provided for by 19 CFR 4.7d.

Importer Security Filing (ISF): For most cargo arriving in the United States by vessel, the importer, or its authorized agent, must submit the data elements listed in 19 CFR 149.3 via a CBP-approved electronic interchange system within prescribed time frames. Transmission of these data elements provide CBP with advance information about the shipment.

Current Actions: CBP is proposing that this information collection be extended with no change to the burden hours resulting from the proposed revision to the information collection associated with the Air Cargo Advance Screening pilot, as there is no change to the data being collected, only to the timing of the collection. There are no changes to the existing information collections under this OMB approval. The burden hours are listed in the chart below.
